

JEKA FISH

Product Catalogue

SeaweedDecor®

We inspire to choose quality. Every time.

Our roots go back all the way to 1964

The sea is our natural element – because Jeka Fish is based in the Port of Lemvig, Denmark, where we feel the breezes off the North Sea every single day. This sharpens our focus and reaffirms our belief that the sea is an eternal source of health and growth.

Our history begins with the establishment of Jeka Fish back in 1985. The company was started by two local entrepreneurs, and started as a traditional fish processor, of local caught fish. Throughout the years the company developed and started to import frozen at sea longline cod in order to secure the best raw material and consistent supply. Today Jeka Fish is one of the biggest producers of wet salted cod fillets, and is specialized in the production of line-caught cod, from the Pacific and Atlantic ocean, shellfish in brine, fish cakes and other seafood products.

We share the same set of values and make the same high demands on quality. Together we provide a wide range of quality seafood products both customized private label products and own branded products for retail, foodservice and industry.

MSC

In Jeka Fish we are certified to produce and sell products with the MSC ecolabel.

ASC

In Jeka Fish we are to produce and sell products with the ASC ecolabel.

Jeka Fish Line caught Cod

Jeka Fish was founded in 1985 and specialize in cod caught in the Pacific and Atlantic oceans using longline fishing.

The company provides wet-salted, lightly salted and re-fresh products all year round with endless packaging possibilities.

Seaweed Decor Vegetable Pearls

SeaweedDecor is a seaweed-based product, which can be used as decoration on various dishes, and as an alternative for caviar. The pearls are 100% vegetable with use of natural colors that doesn't stain or discolor the food you decorate. The taste is fresh, a little salty, and with a texture similar to genuine caviar.
